

## **Backing Up and Syncing**

Recently there had been a lot of discussions on the mailing list. Some of the topics include techniques for backing up/accessing your data and as well as the up and down sides of netbooks, external hard drives and repository syncing. So this week we had an ice cream social to discuss some of these issues. If you enjoy sharing your opinions on netbooks or data backup and synchronization and love ice cream, then this is one meeting you wish you hadn't missed.
